Respiratory outcomes 3, 6 and 12 months post COVID-19 hospitalisation, Pfizer vaccination in Israel, vaccines in solid organ transplant recipients

Peer reviewed journals featured:
- Observational studies on:
  - Respiratory outcomes at 3, 6 and 12 months following hospitalisation for COVID-19 here and associated commentary here
  - Changes in well-being in the COVID-19 vulnerable older population in the UK here
  - COVID-19 misinformation and vaccine hesitancy in Bradford, UK here
  - Impact and effectiveness of Pfizer vaccine against SARS-CoV-2 infections, cases, hospitalisations and deaths in Israel here
- An editorial on the interplay between emerging SARS-CoV-2 variants and pandemic control here
- Commentary on the role of primary care in overcoming COVID-19 vaccine hesitancy in the US here

Letters and correspondence discussed:
- Antibody response to 2-dose mRNA vaccine series in solid organ transplant recipients here
- Early humoral response among lung transplant recipients following Pfizer vaccine here
- Pfizer vaccine effectiveness in healthcare workers here

Pre-peer review articles featured:
- Neutralising antibodies against SARS-CoV-2 variants induced by natural infection or vaccination here
- COVID-19 vaccine perceptions in Ontario, Canada here

Guidance and reports
- The World Health Organization published guidance on:
  - Estimating COVID-19 vaccine effectiveness against severe acute respiratory infections (SARI) hospitalisations with laboratory-confirmed SARS-CoV-2 here
  - COVID-19 immunisation service delivery modalities here
