

Same day surgery admission model: Supplement 2. Procedures suitable for day only or extended day only surgical admission

This document is a supplement to the [Same day surgery admission model: A guide to day stay and extended stay surgical admissions](#), published by the Agency for Clinical Innovation (ACI) Surgical Care Network. The purpose of this document is to provide direction to NSW Health organisations to implement the same day (SD) and extended stay (ED) surgery admission model.

This supplement provides a list of diagnosis related groups identified as suitable for day only or extended day only admission. It should be noted that the list is not exhaustive, other diagnosis related groups may appropriately be admitted based on clinical judgement and specific facility care pathways. Full details of the diagnosis related group descriptions can be found on the Independent Health and Aged Care Pricing Authority website, <https://www.ihacpa.gov.au/>

Australian Diagnosis Related Groups suitable for same day or extended day surgical admission

Same day surgery

These procedures should be considered as day only admissions unless otherwise indicated. Performance against identified benchmarks will be reviewed monthly.

AR-DRG	Procedure
G10B	Inguinal hernia
H08B	Planned cholecystectomy
D11Z	Tonsillectomy
D10Z	Septoplasty
D06Z	Functional Endoscopic Sinus Surgery (FESS)
J06B	Mastectomy
N04B	Abdominal hysterectomy (including laparoscopic assisted)
K06B	Thyroidectomy / hemi-thyroidectomy

Procedures suitable for extended day surgery

These procedures are identified as greater than 50% of planned procedures completed as same day or single night admissions in 2022-23. They should be routinely considered for same day or extended day surgery.
