GP experience of COVID-19 in Australia, risks of delaying second vaccine dose, COVID-19 symptom persistence for up to 10 months

Peer reviewed journals featured:
- A wide-ranging review of COVID-19 in 2021 [here](#)
- A survey on GP experiences of managing COVID-19 in Australia [here](#)
- Observational studies on:
  - Potential risks of delaying the second vaccine dose [here](#)
  - Persistence of SARS-CoV-2 N-antibody in healthcare workers in London [here](#)
- An editorial on racial and ethnic health disparities in healthcare settings [here](#)
- Commentary on:
  - The Oxford COVID-19 Government Response Tracker [here](#)
  - Antibody resistance of SARS-CoV-2 variants B.1.351 (South Africa) and B.1.1.7 (UK / Kent) [here](#)

Letters and correspondence discussed:
- Post-acute COVID-19 syndrome and lessons from other infection-triggered illnesses [here](#)
- Sex-disaggregated data in COVID-19 vaccine trials [here](#)
- Cohort study on acute allergic reactions to mRNA COVID-19 vaccines [here](#)

Pre-peer review articles featured:
- A meta-analysis on the dynamics of the emergence of mutations and variants of SARS-CoV-2 [here](#)
- Case fatality risk of the B.1.1.7 (UK / Kent) variant in England [here](#)
- Internet survey on persistence of symptoms up to 10 months following acute COVID-19 [here](#)
- Antibody response in blood and milk of breastfeeding women after BNT162b2 (Pfizer) vaccine [here](#)
- COVID-19 mRNA vaccine undetectable in human milk [here](#)
- Comparing IgG and neutralising antibody responses after one or two doses of COVID-19 mRNA vaccine in previously infected and uninfected persons [here](#)
