# YOU'RE INVITED TO THE VIRTUAL CARE EXCHANGE FORUM

Long COVID-19 Service – 100% virtual and scalable!
Northern Sydney and Central Coast local health districts

Telehealth high-risk foot service: providing continuity of care for Aboriginal and Torres Strait Islander people
Central Adelaide Local Health Network

THURSDAY, 16 MAY 2024, 1:00 – 2:30PM (AEST)

The ACI is excited to invite you to the May Virtual Care Exchange Forum.

The Northern Sydney Local Health District (NSLHD) **_long COVID-19 service_** has just won the NSLHD Exceptional People Award in the *Research, Innovation, and Digital Health* category. Dr James Zhang and Lorna Hatcher will share their lessons in delivering a model of care that is 100% virtual, while exploring transferability to other service settings and scalability as they extend services into Central Coast local health district.

Aboriginal Health Practitioner Joseph Agius and High-Risk Foot Coordinator Sonja Rogasch join us from Royal Adelaide Hospital in Central Adelaide Local Health Network to discuss their **_telehealth high-risk foot service_**. The continuity-of-care approach has led to improved outcomes for diabetes-related foot complications in Aboriginal and Torres Strait Islander people.

ACI is proud to announce the release of the digital **_virtual care in practice guide_** and provide an overview of the comprehensive online resource that supports the implementation and delivery of clinical care.

The **_open discussion_** is an opportunity for participants to access information, highlight positive advancements or to raise challenges in providing care virtually. Key representatives will be available to support this component.

Schedule

Time	Session
1:00pm – 1:30pm	Long COVID-19 service
1:30pm – 2:00pm	High-risk foot service
2:00pm – 2:10pm	Virtual care in practice guide
2:10pm – 2:30pm	Open discussion
