Ischaemic stroke, neutralising antibodies, second wave, vaccines

Peer reviewed journals featured:

- A multicentre cross-sectional study on ischaemic stroke in patients with COVID-19 [here]
- A cross-sectional study on whether work team identification is associated with reduced stress and burnout among front-line staff in the US [here]
- A review on the robustness of neutralising antibodies to COVID-19 [here]
- Modelling of medical costs associated with keeping the US economy open during COVID-19 [here]
- An editorial on face masks, vision, and risk of falls [here]
- Commentaries on:
  - Regional demand for travel ICU nurses across COVID-19 hotspots [here]
  - The UK Vaccine Taskforce [here]
  - Preserving equipoise and performing randomised trials for social distancing interventions [here]
  - A second COVID-19 wave in Europe [here]
  - Maintaining confidentiality of emerging results in COVID-19 vaccine trials [here]

Letters and correspondence discussed:

- Assessment of the transparency of COVID-19 models [here]

Pre-peer review articles featured:

- A systematic review on pandemic impacts on healthcare utilisation [here]
- A seroprevalence study showing declining prevalence of antibody positivity to COVID-19 [here]
- A retrospective cohort study on COVID-19 infections following outdoor mass gatherings in low incidence areas [here]
- An international cohort study on baseline phenotype and 30-day outcomes of people tested for COVID-19 in South Korea, Spain and the US [here]

News and blogs

- The omission of racism from a UK government report on COVID-19 health inequalities [here]
- Vaccinating nursing home workers against COVID-19 [here]
Vaccines

- As of 28 October 2020, there are 198 vaccine candidates globally, with 40 vaccine candidates in human clinical trials [here](#).
