### Scoring the WOUND-Q©

There is no overall or total WOUND-Q© score, only scores for each independent scale. All WOUND-Q© scales are transformed into scores that range from 0-100. The scores are computed by adding the raw scores for each item in a scale together and then converting the raw sum scale score to a score from 0 to 100. Higher scores reflect a better outcome. Use the Conversion Tables available from the authors to convert the raw summed scale score into a score from 0 (worst) to 100 (best).

### WOUND-Q™ – WOUND ASSESSMENT CONVERSION TABLE

**Instructions:** Higher scores reflect a better outcome. Use the Conversion Table below to convert the raw scale, after rescaling, into summed score into a score from 0 (worst) to 100 (best).
