Post-acute sequelae of COVID-19 (PASC), new digital models of care in ophthalmology, key steps in the Australian vaccine program

Peer reviewed journals featured:
- A meta-analysis of risk profiles of severe illness in children with COVID-19 here
- Narrative reviews on:
  - Post-acute sequelae of COVID-19 (PASC) here
  - New digital models of care in ophthalmology during and beyond COVID-19 here
- A longitudinal survey on gathering, processing, and interpreting information about COVID-19 here
- Observational studies on:
  - An association between age and SARS-CoV-2 antibody response here
  - Risk factors for SARS-CoV-2 infection in patients with inflammatory bowel disease here
  - Temporal variation in the severity of COVID-19, by race and ethnicity here
  - Symptomatic SARS-CoV-2 infection and sustained humoral immune responses here
  - Exposure to SARS-CoV-2 and effective T-cell memory here
- An editorial on scholarly communications in the context of COVID-19 here
- Commentary on the key steps in Australia’s COVID-19 vaccine program here

Letters and correspondence discussed:
- Body weight changes during pandemic-related shelter-in-place in the US here
- Vaccination certificates could entrench inequality here
