

# APPENDIX B

## SEMI STRUCTURED INTERVIEW QUESTIONS

1. What were the main issues at the time of referral to the community team?
2. What were the goals the team were working on with the person?
3. What were the types of challenging behaviours the team encountered?
4. Were the challenging behaviours present initially?  
If not, at what point post-injury did they start to become apparent?
5. In which environments did the behaviours occur?
6. What sorts of consequences or problems were the behaviours causing?
7. How did the team respond – what sorts of strategies/approaches were used?
8. Were there difficulties in implementing the management approaches?
9. Were the interventions useful – what sorts of approaches seemed to work?
10. What have been the outcomes? What is the person doing now?
11. What was the most challenging aspect of the case?
12. What would have helped in making it easier?
13. Was there any evidence of pre-morbid behavioural problems or mental health/substance abuse issues?
14. Were there concurrent rehabilitation issues (physical, medical, functional, psychosocial)?  
To what extent did the challenging behaviours interfere or complicate the management of these other issues?
